

Intelligent Labor & Time Management Solutions

A Smarter Way to Train Your Employees

Timerack's intelligent labor and time management solution lets you easily track employees, whether working onsite, remotely or offsite at a client location. Your staff can easily punch in and out via mobile device, laptop or kiosk, from anywhere, in any environment. The Intellipunch™ feature guides new employees through the time punch process, reducing your onboarding costs.

How Intellipunch works

High turnover in staffing and other industries means you have a new set of employees every day. Training them how to punch is a repetitive, inefficient task, better spent on other, revenue-generating activities. With Intellipunch employees use their unique employee PIN as they are guided through the steps to punch.

Benefits of Intellipunch

With Intellipunch, you gain business efficiencies and reduce time—and ultimately, costs—spent on employee training.

With its guided punch process, Intellipunch also:

- Eliminates repetitive process
- Enhances the employee experience
- Provides an intelligent AI/ML approach
